NEW PRODUCT RELEASE L20 SERIES 1.47" MANIFOLDS

L20
1.47 Manifold
A8021-32*

Standard Manifold (1.03")
A8020-004

Special Manifold (1.47")
A8021-324

(shown with L2003AAWR and 7134-9DB)

INDUSTRY: Oil and Gas Reclamation

APPLICATION: Mounting L20 series valves with 30mm coils in a panel.

PROBLEM: The customer needed to mount L20 valves with 30mm coils in a panel where space was at a premium. Blanking stations created a manifold longer than the panel. Alternating the valve orientation (as shown above) was undesirable because it increased the wiring costs, created an disorderly layout and created difficulties in field troubleshooting.

AV SOLUTION: Created a manifold for L20 valves with 30mm coils that incorporated enough space between stations so that valves could be mounted with all coils on the same side of the manifold. The overall length of the manifold was kept within the customer's specifications.

These extra wide manifolds can accommodate all Explosion Proof, Intrinsically Safe, 22mm and 30mm coils as well as providing additional clearance for manual operators such as palm buttons and hand levers

Order Part Number: A8021-32* (* indicates number of stations: 2, 4, 6, 8, or 10)
